

ENVIRONMENTAL POLICY

Our group of companies provides a comprehensive waste management solution including collection and processing of hazardous and non-hazardous waste from industrial and commercial customers, as well as members of the public. The company operates three waste transfer stations and also offers skip hire, scrap metal recycling and haulage services.

We are committed to providing the highest possible level of service to all our customers, at all levels within the Company. An important part of our service offering is helping to raise client awareness of the most appropriate disposal routes for waste streams in accordance with the Waste Hierarchy.

The Company ensures that all activities are carried out in accordance with environmental legislation and all other regulations relating to its operations.

Across its own sites, the Company promotes recycling and reduction in energy consumption. We are also committed to supporting a wide range of community initiatives and working with suppliers who have their own sound environmental policies.

In order to ensure the achievement of the above commitments, the organisation has implemented an Environmental Management System which satisfies the requirements of BS EN ISO 14001:2015.

An essential feature of the Environmental Management System is a commitment to improving environmental performance. This is achieved by setting annual environmental improvement objectives and targets, which are regularly monitored and reviewed. The objectives and targets are publicised throughout the Company and all staff are committed to their achievement.

This Policy and the obligations and responsibilities required by the Environmental Management System have been communicated to all employees and any representatives working on behalf of the Company.
